1. The following is an examiner's statement of reasons for allowance:

The reference (US '938) differs from the present claims in that the claimed compositions have broader temperature range than the reference, especially, lower limit temperature of a nematic phase ( $T_c$ ). Also, the claimed compositions have higher voltage holding ratio on a thermally aged element (VHR-2). See the comparison of liquid crystal properties between the reference Examples and the present invention shown in the Declaration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
